Igniting Innovation

Be Able, Stay Stable – Public Workshop Falls Prevention and Management

The health and social care system in Leicester, Leicestershire and Rutland are working with industry and third-sector organisations to provide an innovative and integrated solution to improve the prevention and management of falls of people in the community. Early action and intervention can prevent falling later in life or repeat falls.

The service will include public awareness and education, screening, assessment, self-help, structured exercise programmes and assistive technology if required.

The programme delivery team would like to invite you to join a workshop at which industry suppliers will demonstrate, and give you the chance to try different elements of the service, including assessment technology, exercise options, and supportive devices for in the homes. These devices are aimed at:

- Identifying risk factors of falls and supporting you to reduce/remove these risks
- an escalating risk of falling, alerting professionals to offer preventative support
- when a person has actually fallen, ensuring a fast response by appropriate services

Your views will inform the way devices are offered to and used

**22nd March 2018 2pm-4pm
